

# BELFRY

## BUFFER

---

Once in a time when the streets were grey and dark, filled with dust and dirt the humankind lost the believe in the beauty of the world. But in these old days there was one thing above the chimneys that brought back the enlightenment they were craving for. Open your ears and hear the sweet clang coming down from the graceful BELFRY.

The BELFRY is KMA Audio Machines' approach of a high-fidelity natural sounding and studio-like signal buffer to keep your signal fresh and silky-smooth even with the longest cable or biggest pedalboard. To preserve your signal and allow a strong signal the BELFRY is powered by a standard 9V DC power and internally converted to 18V for a higher headroom, sparkling highs and a nice

round top end. We choose a small footprint for the BELFRY to fit in on every pedalboard without any problems or even underneath standard boards like pedal-trains or similiar boards. The high input impedance of the BELFRY ensures the use of even pedals with high output impedance without any issues. And also the low output impedance will guarantee a full frequency spectrum independent from what's coming after the BELFRY. It will not colour your tone or give you overpronounced highs and top end. Your tone will sound as it comes directly from your instrument.

So plug in and find out - the BELFRY will bring back the sun to your ears.

## SAFETY INSTRUCTIONS

---

This device is intended to be used for sound processing of signals from musical instruments. Any other use or use under other operating conditions is considered to be improper and may result in personal injury or property damage. No liability will be assumed for damages resulting from improper use.

## OPERATING CONDITIONS

---

This device has been designed for indoor use only. To prevent damage, never expose the device to any liquid or moisture. Avoid direct sunlight, heavy dirt, and strong vibrations.

## EXTERNAL POWER SUPPLY

---

Use only with 9V power supply. Failure to do so could result in damage to the device and possibly the user. Unplug the external power supply before electrical storms occur and when the device is unused for long periods of time to reduce the risk of electric shock or fire.

## WARRANTY

---

We offer a 5-year warranty. The warranty expires immediately if the product is changed, operated incorrectly, intentionally or negligently damaged, or if it is damaged by force majeure or use beyond the permitted operating conditions.
